Vote of Thanks by Organizing Secretary	Dr. Chikkanna G.S.	1.35pm-1.40pm

National Webinar On

HORTICULTURAL RESOURCES AND THEIR ROLE IN BOOSTING IMMUNITY AGAINST COVID-19

About Webinar:

While our first instinct is to race to the chemists to stock up in products suppose to fight infection vigorously with reducing the severity and duration of the pandemic Covid-19 virus activity threatening valuable human life elsewhere in the world, but on the other hand, there is a thrust need from green grocery to stock up on horticultural resources to suffice needs of building up immunity within the body slowly to fight before virus the taking strong hold. Diverse agro-climatic conditions in India ensure the production of all types of fruits, vegetables and medicinal plants in different parts of the country. Health consciousness among people is increasing. Majority of the population in India are vegetarian. As a result, the demand of fruits and vegetables is also high. There is increased awareness among people for beneficial effect of nutraceutical in day to day life. The horticultural crops like Fruits and Vegetables, Spices and Condiments, Ornamental, Plantation, Medicinal and Aromatic plants are commonly used by us can serve an important prophylactic and therapeutic role in ingredients of food in our day to day life. Hence, there is an urgent need to explore the beneficial and medicinal properties of horticultural crops. Horticultural crops not only supply CHO, proteins, vitamins, minerals and essential Amino Acids, they also play an important role as antioxidants, phytoestrogens and anti-inflammatory agents through various protective mechanisms.

The present National webinar discusses different scientifically validated medicinal role of horticultural crops along with their phyto-constituents, important health promotion and protection of human beings against Covid-19 virus.
